ASPECT

The Airborne Spectral Photometric Environmental Collection Technology (ASPECT) aircraft found no exceedances of the Texas comparison values. ASPECT conducted a screening level assessment to evaluate the unreported or undetected releases of hazardous materials or contaminants at the International Terminal Corp in Deer Park, Texas from March 17, 2019 through March 18, 2019. The screening level results from ASPECT were compared to the ASPECT list of Texas Commission on Environmental Quality (TCEQ) short-term Air Monitoring Comparison Values (AMCVs) and found no exceedances of the short-term AMCVs.

In addition, EPA has identified 23 locations to conduct mobile handheld air monitoring. No results above the detection limit have been observed.

Internal work product – this is a draft document and will be finalized once the validated data is received
